

SINGER'S CHEAT SHEET! By Fel

Basic Vowel Substitutions

EE (e.g. feel) -> IH
OO (e.g. who) -> UH
AA (e.g. hand) -> EH

(you can use the AA to place it in the mask, and keep EH in back).

Common Diphthongs (combined vowel sounds)

Hang on to the first, more open vowel for the majority of the note.

DAY -> DEH (EE)
NIGHT -> NAH (EE)(T)
SOUND -> SAH (OO)(ND)

Consonants to Minimize

In words like "HOLD" or "FOLD," sing OH or UH and minimize the L-s so you barely say them (HOLD -> HUHD).

Hard R-s are minimized or ignored, and end consonants minimized (UNDERSTAND -> UHN DAH STEH).

Closed ND-s or N-s can be pronounced with a slight tongue stop instead of being fully articulated (AND -> EHN).

For this and more goodies, don't forget that my comprehensive A-to-Z singing course *Singing Transformation* is re-opening January 2017! Visit SingingTransformation.com to learn more.

Go forth and sing beautifully! Love, Fel
